

ELITE ENGINEERING (EUROPE) LTD.

Company Profile

2009-2016

1

About Us

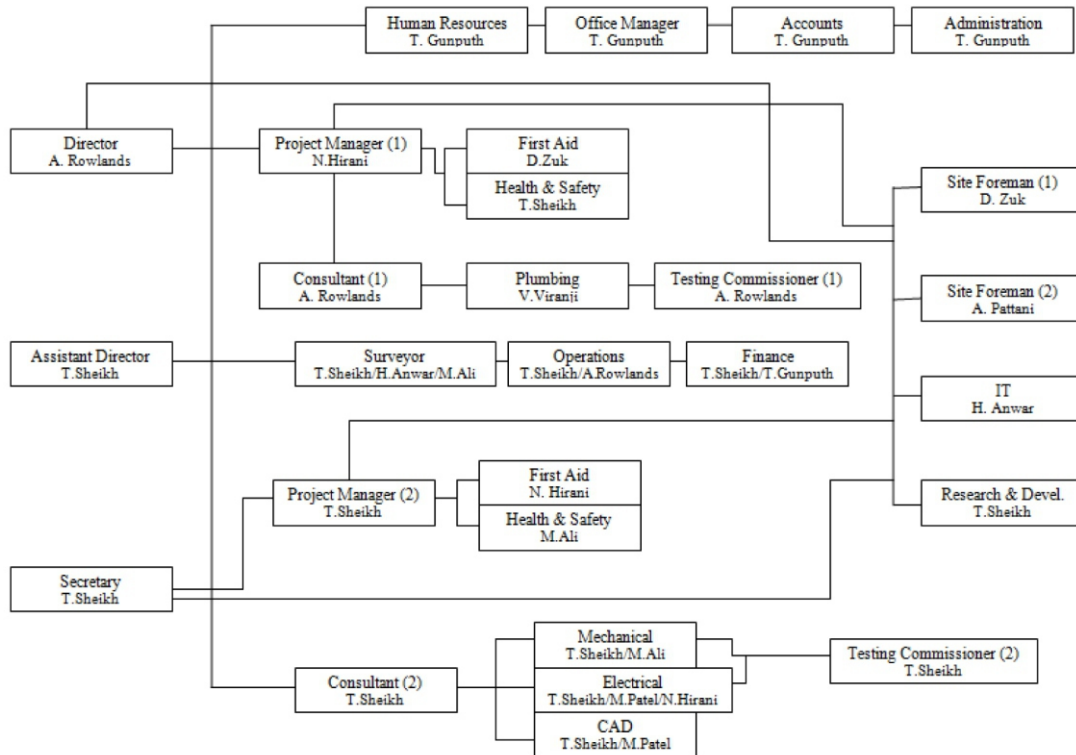

Elite Engineering has experience in the Construction industry for the past 20 years. Our growth has been built on our established reputation in achieving high standards of Services Delivered. The core business continues to be in the Mechanical, Heating and Electrical Services Sector for Industrial, Commercial, Domestic, Private and Local Authority / Social Housing.

Based in London and backed by the reassurance of a solid reputation for quality and a proven customer-driven service. Elite Engineering offers an alternative fresh approach for specifiers of Air Conditioning, Ventilation and Electrics. Our strong clientele including some big names in UK makes us one of the leading competitors in the market.

2

Company Organisation

Elite Engineering believes that the qualities of a company are based on their own reliable staff. The company also believe that mutual trust and respect with staff and clients enable us to develop a strong relationship to ensure that all elements of a bespoke project are met.

Elite Engineering is an equal opportunity employer and is committed to a policy of treating all our employees and job applicants equally.

3

Services

Elite Engineering has a wide expertise in the installation, Service and Repair of Mechanical, Ventilation, Plumbing, Heating and Electrical Services. We also offer renewable energy installations and Design i.e. Solar, Air Source and Ground Source. We maintain over 2500 Heating and Electrical Installations per annum. In addition we maintain services for Offices, Schools, Commercial and Domestic Buildings.

Elite Engineering specialise in a range of mechanical and electrical facilities maintenance, including air conditioning, which is undertaken by our team of qualified specialists, on a mobile and residential basis, supported by our management and administration team at base.

In addition to the planned and reactive maintenance, we provide a call out service, enabling clients to contact our duty technicians 24 hours a day, 365 days a year, in the event of emergencies.

Elite Engineering operates throughout the UK, undertaking installation projects in commercial and public sector buildings, retail outlets, plus education and medical facilities, on behalf of the biggest names in construction.

To support our maintenance operation Elite Engineering has the capability of carrying out mechanical & electrical installations, system modifications and fit out works, providing clients with a total building services engineering solution.
